CSc 59929

Assignment due March 3, 2020

- Compete the programming exercise described in the following charts.

- Start looking for an interesting dataset for your project.

Programming Exercise

- Download the Decision Tree Code that we reviewed in class.

- Extend the Code to include the case of **learning a rhombus with interior angles of 45° and 135°.**

The City College of New York
CSc 59929 – Introduction to Machine Learning
Spring 2020 – Erik K. Grimmelmann, Ph.D.

2

Programming Exercise

- Discuss your findings.

- Include all of your discussion in your .ipynb file and submit the file through Blackboard. The name of your file should be

  lastname_firstname_AS03.ipynb

- Do not clear your results after you last run so that I will be able to see your results without rerunning your code.

- If you collaborate with anyone on this assignment, be sure to follow the collaboration guidelines in the syllabus.
